

ISO/IEC 27005 Certified Risk Manager

3 Days (21 Hours) Exam included

Our **3-day PECB Certified ISO/IEC 27005 Risk Manager course** provides valuable information on risk management concepts and principles as described in ISO/IEC 27005 and ISO 31000.

- Gain the knowledge and skills to identify, assess, analyze, manage and communicate information security risks on the basis of ISO/IEC 27005
- Get an overview of other best practice risk assessment methodologies
- Complete your exam successfully on day 3 and gain the PECB Certified ISO/IEC 27005 Risk Manager designation
- Includes the examination fees and extensive training materials
- Each learner will receive a course completion certificate with 21 CDP credits

COURSE OBJECTIVES

Due to technological advances and the complexity of cyber-attacks, **the demand for information security risk assessment and management professionals continues to grow**. As such, the ISO/IEC 27005 Risk Manager certification has become the standard for best practice in information security risk assessment. By obtaining certification, you demonstrate a level of competence that adds value not only to your career, but also to your organization. It can help you stand out from the crowd and increase your earning potential.

This course teaches **how to conduct an information security risk assessment** by combining information from ISO/IEC 27005 and ISO/IEC 27001. In addition to theoretical knowledge, this course is equipped with practical exercises, quizzes, and case studies, making it a very engaging training course.

With its probing questions and exercises, this training course will inspire you to have a closer look at your organization. When focusing on **risk management for a successful ISMS**, you need to be very clear about what, how, when, why and who will be involved. The goal of this training course is to instill in you the curiosity that a good risk manager must have.

A the end of this training course, learners will be able to:

- Explain the risk management concepts and principles outlined by ISO/IEC 27005 and ISO 31000
- Establish, maintain, and improve an information security risk management framework based on the guidelines of ISO/IEC 27005
- Apply information security risk management processes based on the guidelines of ISO/IEC 27005
- Plan and establish risk communication and consultation activities
