

# COBIT® 2019 Foundation eLearning

Duration: 3 hours study time / 365-day access / exam voucher included

Our COBIT® 2019 Foundation eLearning course will give you a deep understanding of the COBIT framework for managing and governing enterprise IT environments.

COBIT 2019 certification provides an end-to-end business perspective for IT governance and reflects the role of IT in creating value for enterprises.

You will master COBIT principles, enablers, implementation phases, and process capability assessment models.

## What is included in this COBIT® 2019 Foundation eLearning?

- 3+ hours of high quality self-learning content
- 24/7 support with dedicated mentoring sessions
- Industry recognized course completion certificate
- COBIT 2019 exam voucher included

## COURSE & LEARNING OBJECTIVES

### At the end of this training, participants will:

- Recognize the need for an effective framework to govern and manage enterprise IT and learn to create value for enterprises
- Relate to the COBIT framework concepts and understand its use with other standards and best practices
- Understand the five principles and seven enablers, along with the importance of good practices for better governance and management
- Understand the IT management issues that are affecting organizations, including pain points and trigger events
- Learn COBIT functions, the benefits of using COBIT, various governance and management processes, and the process reference model
- Implement COBIT in practical situations, specifically dealing with issues that often occur in enterprises
- Understand the concepts of process capability assessments and how various processes may be improved through the seven-stage lifecycle approach
