# AgilePM v3 Foundation Training & Certification

Master agile project leadership & value-driven delivery with AgilePM® v3

Agile Project Management - AgilePM® v3 Foundation

Deliver value faster, lead confidently, and manage change effectively.

Learn how to **flex and deliver agile projects** that truly meet your customers' needs — on time, on budget, and with measurable business value. Through this **unique 2-day AgilePM® v3 Foundation training** in Brussels (Belgium), you will build the knowledge and skills to manage projects with agility, confidence, and low risk.

This course helps you:

Understand the **core principles, lifecycle and leadership mindset** of AgilePM® v3-the latest version from APMG International.

Learn how agile project management differs from traditional approaches, and how to blend agile practices with governance and control.

Prepare for and pass your **AgilePM® v3 Foundation certification exam**, recognised worldwide.

Whether you're a project manager, Scrum Master, business analyst, or team leader, this course will give you the tools and confidence to lead successful agile projects and contribute to your organisation's digital transformation.

Gain a competitive edge in your career by mastering a globally trusted agile framework, valued by organisations across Belgium and Europe.

#### By the end of this 2-day course you will be able to:

- Understand the AgilePM® v3 principles, value-driven lifecycle and governance approach.
- Grasp the agile project lifecycle, roles & responsibilities (including project manager/leader, team, agile delivery engine).
- Facilitate collaboration and communication within agile teams using practices such as facilitated workshops, MoSCoW prioritisation, time-boxing (sprints), user stories and iterative development.
- Estimate and control agile project work: effort estimation, duration, project planning through the AgilePM lifecycle.
- Integrate agile practice with governance, risk management and quality assurance in project delivery.
- Tailor AgilePM to your organisation's context (hybrid/traditional + agile) and be fully prepared for the AgilePM®
  Foundation exam.

#### **COURSE OUTLINE**

# Topics covered during this 2-day course:

- What is Agile? How to choose an appropriate agile approach
- The Agile manifesto, principles and AgilePM® v3 philosophy
- The AgilePM® lifecycle (processes) and project-governance products
- Roles & responsibilities in an agile project
- Key techniques: prioritisation (MoSCoW), time-boxing/sprints, iterative development and modelling
- Requirements & user stories, planning and control, estimates and durations
- Quality assurance in agile, risk management in agile environments
- Tailoring AgilePM® to your organisation's needs (hybrid/scale/multi-team)
