

AgilePM v3 Foundation Training & Certification

Become a Certified AgilePM® v3 Foundation Project Leader — in 3 Days

About the AgilePM® v3 Foundation Course

Our 3-day **AgilePM v3 Foundation** course is the fastest way to gain a globally recognized Agile project leadership certification — without giving up the structure, governance and discipline that real-world projects demand. You'll leave with a clear framework, hands-on practice, and the confidence to pass the official APMG exam.

□ **APMG Accredited Training Organization** (since [year])

□ **750+ AgilePM professionals trained** across Belgium and Luxembourg

□ **95% exam pass rate** — among the highest in the Benelux

□ **3 languages:** EN · NL · FR

□ **Eligible for KMO-Portefeuille, Chèques-Formation Wallonie, Brussels subsidies**

□ **Includes:** official APMG exam, AgilePM v3 Reference Book, accredited training materials, refreshments and lunch

LEARNING OBJECTIVES

Gain a competitive edge in your career by mastering a globally trusted agile framework, valued by organisations across Belgium and Europe.

By the end of our AgilePM® v3 Foundation course, you will be able to:

- Apply the **8 principles of AgilePM v3** to lead value-driven projects
- Navigate the full **AgilePM lifecycle** — from feasibility through to benefits realisation
- Use **Scrum** correctly as the team-level delivery engine inside AgilePM's project-level governance
- Define and assign the right **roles and responsibilities**, from Sponsor and Visionary to Solution Development Team
- Apply core practices: **timeboxing, MoSCoW prioritisation, iterative development, facilitated workshops**
- Coordinate **multi-team Agile projects** with the right level of control
- **Pass the AgilePM v3 Foundation exam** with confidence

COURSE OUTLINE

1. Introduction to Agile & AgilePM v3

- Agile philosophy, values and principles
- Why AgilePM exists and what problems it solves
- Key changes introduced in **version 3** (value focus, leadership, Scrum integration)

2. Scrum Essentials (major addition in v3)

- Scrum roles: **Product Owner, Scrum Master, Developers**
- Scrum events: **Sprint, Sprint Planning, Daily Scrum, Sprint Review, Retrospective**
- Scrum artefacts: **Product Backlog, Sprint Backlog, Increment**
- Empirical process control (transparency, inspection, adaptation)
- **How Scrum fits within AgilePM:** Scrum as the *delivery engine* that feeds into AgilePM's project-level governance

3. AgilePM v3 Roles and Responsibilities

- Project-level roles (Sponsor, Visionary, Project Manager/Leader, Business Analyst, Solution Development Team, etc.)
- Interaction between AgilePM roles and Scrum delivery roles
- Creating a collaborative team environment

4. AgilePM v3 Project Lifecycle

- AgilePM lifecycle steps from pre-project to final delivery
- Alternative lifecycle configurations
- Understanding governance and project products at each stage

5. Requirements, Estimation & Prioritisation

- Business case, user stories, and requirement models

- **MoSCoW prioritisation** (Must, Should, Could, Won't)
- Backlog management
- Estimating and planning in iterative environments

6. Planning, Control & Risk Management

- Iterative and incremental planning
- Timeboxing (including Sprints within Scrum)
- Quality criteria and quality control
- AgilePM's approach to risk, change, and governance

7. Working with Agile Teams

- Team dynamics and communication
- Facilitated workshops
- Empowerment and agile leadership behaviours
- Interactions between AgilePM project teams and Scrum delivery teams

8. Exam Preparation and Exam at the end of Day3

- Examination format (50 MCQ, 60% passing score)
- Sample questions and group review
- Exam tips and best practices

This is not a slide-reading course. You'll work in small groups on a **realistic case study**, with exercises and discussions. Our trainers are **experienced practitioners**, not full-time presenters — they bring real project stories from finance, government, IT and consulting clients in Belgium and across Europe.

Throughout the course you will work on a case study and exercises to apply the knowledge. The official handbook is included in paper-format for face-to-face courses and in pdf-format for live virtual students.

WHO IS THIS COURSE FOR?

- **Project managers** (traditional or Agile) who want a recognized Agile credential
- **Scrum Masters, Business Analysts and Team Leaders** ready to step up to project leadership
- **Sponsors, senior managers and PMO professionals** who govern Agile delivery and need to speak the language
- **Career changers and graduates** entering project management — no prior experience required
- **Whole project teams** training together in-company to align on a shared method

PREREQUISITES

There are **no formal prerequisites** for this Foundation course.

ABOUT THE FOUNDATION EXAM

The AgilePM v3 Foundation exam is **40 minutes, 50 multiple-choice questions, 60% pass mark, closed book**. You'll take it online with **B2B Learning's own supervision on the 3rd day of your training**. Prefer to schedule it yourself? We can provide an [APMG ProctorU](#) **exam voucher** instead, valid for 12 months (please inform us on the first morning).

WHAT'S INCLUDED IN YOUR COURSE FEE:

- 3 days of accredited classroom or live virtual training
- Official **AgilePM v3 Reference Book** (Edition 2)
- All accredited course materials: slides, exercises, sample exam papers
- Official APMG **AgilePM v3 Foundation exam** (1 attempt)
- Certificate of attendance
- Refreshments and lunch (in-person sessions)

Languages, locations & formats:

Choose what works for you:
