Our **ISO/IEC 27001:2022 Foundation** course is more than just theory—it's a hands-on introduction to the structure, principles, and operation of an **Information Security Management System (ISMS)**. Perfect for those new to ISO standards or information security, this course provides a practical understanding of how to align your organization with global best practices.

LEARNING OBJECTIVES

- Learn the **core principles** of ISO/IEC 27001:2022 and how it combats cyber threats and improves governance.
- Get familiar with key ISMS components:
    - ISMS policy and objectives
    - Information security risk assessment and treatment
    - Roles and responsibilities
    - Monitoring, measurement, analysis, and evaluation
    - Internal audits and management reviews
    - Continual improvement practices
- Discover how ISO/IEC 27001 helps organizations:
    - Protect sensitive information from breaches
    - Ensure business continuity
    - Comply with legal and regulatory requirements

COURSE OUTLINE

Day 1 – Introduction to Information Security & ISO/IEC 27001

- The role of information security in today's digital economy
- Overview of ISO/IEC 27001 and the Annex SL framework
- Key ISMS concepts: risk, threats, vulnerabilities, controls
- Structure and clauses of the ISO/IEC 27001:2022 standard
- Context of the organization and stakeholder analysis

Day 2 – Implementing the ISMS & Certification Essentials

- Leadership, planning, and support in the ISMS lifecycle
- Risk assessment and treatment methodology
- ISMS documentation and control implementation
- Monitoring, internal audit, and continual improvement
- Preparation for the PECB certification exam

Throughout both days: Interactive sessions, real-life examples, and opportunities to apply concepts through case studies and group discussions.
