

# ITIL Experience (Version 5) Training & Certification

3-day ITIL® Experience Training Course □ Exam voucher and 1-year Membership included

Discover how to design and improve digital experiences that matter to customers, users, and employees, and translate them into measurable value.

Experience is now a key factor in differentiating businesses. Organisations need to do more than just be operationally efficient; they also need to **create interactions that feel seamless, relevant and valuable**. ITIL Experience (version 5) helps to bridge the gap between delivery and perception, turning experience into a strategic advantage.

## What are the benefits of taking this course?

- Gain a strong understanding of how experience is a core part of value creation
- Learn practical methods for designing and improving the experiences of customers, users and employees
- Gain insight into how experiences influence satisfaction, adoption and business performance
- Learn how to connect service delivery and product management with measurable human outcomes

## WHAT'S INCLUDED IN YOUR COURSE PACKAGE?

Everything you need to prepare confidently for certification:

- **Live training** with an **expert accredited ITIL® version 5 trainer**
- Official PeopleCert **training materials** in digital format
- Official **ITIL Experience Guide** in both **digital and printed editions**
- **Certification exam voucher** valid for **1 year**
- **1 year of PeopleCert Plus Membership**

## COURSE & LEARNING OBJECTIVES

By the end of this course, participants will be able to:

- explain experience as a human response shaped by anticipation, perception, and evaluation over time
- understand digital experience as a driver of trust, engagement, adoption, and value
- analyze different stakeholder perspectives and tensions across real journeys
- identify how experience emerges across lifecycle stages, service journeys, and interactions
- capture and interpret experience evidence using both narrative and numerical signals
- evaluate experience through trustworthiness, coherence, and related criteria
- apply continual experience improvement using a notice-interpret-hypothesize-experiment approach
- understand how AI affects trust, perception, and experience, and how governance and ethics support responsible use
